

A New Home for LIFTT in Glendive

A new space for independence, opportunity, and community in Eastern Montana.

LIFTT is proud to share an exciting milestone for our work in Eastern Montana. Our Glendive office is moving to a new home at 206 South Douglas Street.

For many people in rural communities, finding support, guidance, and opportunities for independence can be challenging. This new building will help ensure that individuals and families across Eastern Montana have a welcoming place to turn when they need information, encouragement, and practical support.

The building will become a permanent home for several important LIFTT programs that serve our community.

LIFTT's Independent Living Services

These services help individuals with disabilities and aging adults develop the skills, confidence, and support they need to live independently. Through peer support, independent living skills training, information and referral, advocacy, and help navigating benefits and community resources, LIFTT works alongside individuals to help them build the lives they want.

The RideWell ADA Accessible Rural Transportation Program

RideWell is LIFTT's new transportation initiative designed to address one of the biggest barriers facing rural communities: access to transportation. The program will provide

safe, reliable, ADA-accessible transportation so people can reach medical appointments, pharmacies, jobs, education, and essential services.

The upLIFTT Thrift Store

The upLIFTT Thrift Store will offer affordable clothing, furniture, and household goods to the community. It will also create a space where neighbors can support one another while helping sustain LIFTT's programs and services in Eastern Montana.

This move represents much more than a change of address. It reflects LIFTT's commitment to the people who come to us looking for support, guidance, and opportunities to live more independently.

For many individuals in Eastern Montana, services like peer support, independent living skills training, advocacy, and information and referral can make a life-changing difference. Having a permanent and welcoming space allows LIFTT to provide these services with greater stability and room to grow.

The former KXGN broadcasting building has long been a familiar landmark in the Glendive community. Soon it will begin a new chapter as a place where independence is strengthened, barriers are reduced, and opportunities are expanded for people across Eastern Montana.

We look forward to welcoming the community into this new space and sharing the next chapter of LIFTT's work in Glendive.
